Application: 90% of nutrient absorbing roots are within the top 1 ft. of soil with most in the first 6". These absorbing roots start well out from the trunk in established trees, and if unhindered will extend well beyond the dripline. This is the area to be fertilized. Auger 3" holes every 3 feet. The holes should be 6" to 8" deep. Put 4 oz. of Pride 20-12-8 per hole.
